SKILLS

- JAVA SCRIPT
- HTML&CSS
- Python Programming
- Bootstrap

PROJECTS

Fruit Stall Management and Customer Details System (CRUD) – Python Tkinter

Developed a desktop application using Python Tkinter to manage fruit inventory and customer records with Create, Read, Update, and Delete (CRUD) operations. Completed as part of a Python Certification Course.

Car Showcase Website (CRUD) – Django

Built a web application using Django to display car models and their prices with CRUD functionality. Completed as part of a Django Certification Course at G-TEC Computer Education.

Straw Hats Anime Website – HTML & CSS

Developed a complete static website based on the anime crew "Straw Hats" using HTML and CSS. Designed a navigation system linking character profile pages, embedded with custom styling.

Sales Dashboard – Microsoft Excel

Created a sales dashboard to collect and manage customer data, track product sales, calculate selling costs, and generate weekly reports for management.

Restaurant Website – HTML, CSS, Bootstrap & JavaScript

Developed a responsive restaurant website featuring menu sections, navigation, image galleries, and interactive user interface components using HTML, CSS, Bootstrap, and JavaScript.
